PERFO

STARTING POINT

The 2026 budget review originated from the need to redistribute FTD targets across channels, placing greater accountability on direct-result channels (Performance and Affiliates) and reducing the weight of awareness channels (Influencers and Brand) in the quantitative target.

CHANNEL	BEFORE	NOW	CHANGE
Performance	43.0%	33.5%	-9.5pp
Affiliates	13.3%	33.1%	+19.8pp
Direct-result channels	56.3%	66.6%	+10.3pp
Influencers	11.5%	5.3%	-6.2pp
Brand & Media	32.1%	5.0%	-27.1pp
Awareness channels	43.6%	10.3%	-33.3pp
Organic / Direct	-	23.1%	visible with UTM

Before: original Jan-Dec 2026 plan (92,050 FTDs). Now: revised May-Dec 2026 plan (53,662 FTDs, excl. R\$13.4M contingency). Total budget Sep/25-Dec/26: R\$58.2MM.

1 OVERVIEW

BUDGET & FTD SUMMARY

Performance is the largest paid channel, representing 28% of total media budget for the period. The allocation is concentrated in the second half due to Copa do Mundo seasonality (Jun/Jul peak) and ramps down from August as the Copa effect fades. FTD targets increase throughout the period as the CPA efficiency improves.

CPA REDUCTION

CURVE

May anchored to actual performance (\$195.37 as of 27/05). Jun/Jul peak with Copa do Mundo investment (\$330K and \$310K), delivering CPA drop to \$130 and \$113. Aug–Dec budget redistributed to produce a smooth, monotonically decreasing curve: \$80 → \$76 → \$71 → \$66 → \$60, with ~\$5 reduction per month.

*May actual as of 27/05 (BW BR - CPL x Mes I Interno Perfo 2026). Bar length proportional to CPA. Red = above \$150 · Amber = \$100-\$150 · Green = below \$100.

METHODOLOGY &

ASSUMPTIONS

CPA CURVE LOGIC

Jun (\$330K) and Jul (\$310K) peak for Copa do Mundo (Jun 11-Jul 19). Post-Copa budget redistributed across Aug-Dec for a harmonic descent: \$80 (Aug), \$76 (Sep), \$71 (Oct), \$66 (Nov), \$60 (Dec), roughly \$4-5 per month. May anchor at \$195.37 is actual per BW BR - CPL x Mes I Interno Perfo 2026 (27/05). Total Aug-Dec envelope preserved at \$914,199.

FTD DISTRIBUTION SOURCE

Monthly FTD targets derived from the internal Forecast currently in final approval. Performance uses the ex-affiliates seasonality index applied to the annual total of 19,729 FTDs. August dip reflects post-Copa normalization; Dec peak reflects end-of-year acquisition push.

OPEN ITEMS

Confirmed spend Set/25-Mai/26: R\$16.1MM (source: BW BR - CPL x Mes I Interno). Annual cost projection leaves R\$13.3M balance available for reinvestment across all channels. Performance is a candidate to absorb part of that surplus if planned Aug-Dec CPAs are achieved.
