Assignment

Question 1: WL Proposition in Brazil – Obesity Focus

We recently launched a wellness (WL) proposition in Brazil targeting obesity:

 <https://www.voysaude.com.br/>

Product Offering

Eligible patients subscribe to a monthly plan with GLP-1 offering Wegovy or Mounjaro

Current Performance Metrics

- **Conversion Rate:** 0.5%
- **Cost Per Click (CPC):** \$1
- **Target Customer Acquisition Cost (CAC):** $\leq$ \$100
- **Primary Channel:** Meta
- **Volume pacing:** 2k acquisitions (vs. 4k acquisitions target)

Customer Insights (From 20 Non-Converters)

- 50%: Pricing perceived as too high
- 30%: Confusion about the product offerings - not clear what we are offering
- 10%: Wanted to speak with someone before purchasing

Market Context:

- Our main competitors in Brazil are physical and digital pharmacies.
- We know that the market in BR for WL GLP-1 drugs is very large and the largest pharmacy sells 150k units per month

Your Task

Please provide recommendations on:

- **Value Proposition:** what shall be our offering and pricing strategy to consumers. How can we differentiate vs. the market?
- **Acquisition Strategy:** Channels, messaging, etc. how should we increase the number of new customers?
- **High Retaining product:** how would you think about building a high retaining product? I.e., where customers stay with us for a long time.
- **Iteration Process:** How you would refine the product and go-to-market approach?
- **Overall category strategy:** what other levers should we pull to boost the category?

Finally on growth, what would you do? We are currently pacing at 2k acquisitions and we need to achieve 4k acquisitions with 50% better efficiency this month.

- How would you achieve this?

Question 2: Channel performance

1. Using the attached dataset  MANUAL Case Study: Growth
 - Identify which channels are driving growth and which are inefficient.
 - Quantify CAC, CVR, and ROI trends by channel over time.
 - Explain why performance has plateaued and where the biggest opportunity lies.
2. Prioritise the top three efficiency levers and the top three scaling levers.
3. Recommend an initial reallocation of budget to reach the 7,000-acquisition target without increasing spend.
